

# The Gunyah

An excellent choice for our grey nomads

**Queensland business, Ozzie Off-Road (OOR) has an established, and enviable, reputation in the manufacture of high quality camper trailers.**

The brand has been around for sixteen years and during that time it has remained a family owned business with a focus on customer satisfaction. The firm sends its products to an Australia wide customer base.

The lightweight luxury off-road caravan, the Gunyah, is a new addition to the product range and is manufactured entirely by OOR.

OOR's goal has been to provide a comfortable living environment in a compact and highly manoeuvrable all terrain caravan. To ensure the strength required to achieve this, the Gunyah is built on a galvanised steel chassis with a complex, fully welded, alloy skeleton supporting the superstructure. A 3mm composite alloy panel makes up the main exterior surface, with the traditional polished armour plate to the lower parts. In keeping with the "strong but light" theme, all interior surfaces are finished in cutting edge, rot resistant, lightweight materials.

Ozzie Off-Road chose the Cruisemaster coil spring independent suspension system for the Gunyah. It's widely recognised as the leader in its field. The caravan is attached to

the tow vehicle with a locally made Hyland 3500 off-road ball coupling.

As for creature comforts, the Gunyah boasts a long list of standard inclusions. Items such as air conditioning, hot water, shower & toilet, radio & CD player, slide out external kitchen, loads of internal & external storage, Aussie Traveller awning, and roof mounted solar panel are just some of the luxuries you can expect. As a bonus the Gunyah is provisioned with cabling for TV and can also be equipped with a rear view camera.

It is even possible to have an RV Roof Air Lifter System fitted to the pop top for a small additional cost - an ideal option for the more mature caravanner.

For the "end of day" comfort that we all crave, you can choose between large split queen twins or a full queen size bed and really have a good night! There is even a 4 berth option available.

Have a close look at the Gunyah, it delivers much more than you might imagine. Without doubt, the best value for money currently available in Australia.
